Dear Members of the Board of Directors:

We, the members of the Gamma Iota Tau Colony at Georgia Institute of Technology, hereby submit this petition requesting affiliation with Delta Sigma Pi. We seek to uphold the mission and purpose of Delta Sigma Pi.

The Gamma Iota Tau Colony has met and exceeded the requirements necessary to become a chapter as stated in the National Bylaws. Attached are the required documents, including letters of recommendation, a history of Georgia Institute of Technology, Scheller College of Business and the Ivan Allen College of Liberal Arts, a list of events conducted by the colony, and comprehensive member biographies.

Sincerely, the undersigned members of the Gamma Iota Tau Colony:

 Olivia Malice, SVP	 Sahithi Solipuram, SVP	 Shan Bawany,
 Mita Rangarajan, VPCO	 Morvarid Maghari, Chancellor	 Haley Howard, VPAR
 Quynh Nguyen, VPPA	 Paul Giorgi, VPCS	 Nicole Henson, VPSA

Delta Sigma Pi Board of Directors

c/o. Delta Sigma Pi Central Office

330 South Campus Avenue

Oxford, OH 45056

It is with great pleasure that I recommend to the board that Delta Sigma Pi colony at the Georgia Institute of Technology be elevated to full chapter status.

As a brother in the original Deltasig Zeta Lambda chapter at Georgia Tech I fully appreciate the positive impact Delta Sigma Pi has on our campus and in the lives of the chapter members. I was delighted when Olivia Malice approached me in the Spring 2014 regarding reactivating Delta Sigma Pi. I was immediately impressed by Olivia's passion for the fraternity and the commitment she was willing to make to start-up the colony. Olivia hasn't disappointed and I have been greatly pleased by the progress made in forming the colony – especially in terms of member participation in a variety of professional activities and in terms of colony integration into the regional and national Deltasig events.

In recommending the colony for full chapter status I have considered the following:

Leadership. As mentioned earlier I have been greatly impressed by Olivia Malice, but perhaps even more impressive is the next “generation” of leadership being developed. With any student organization there has to be some concern in terms of whether the passion and commitment by the student founders will be carried forward after those students graduate. As an advisor to a number of student organizations on campus I have directly experienced the impact of the ebbs and flow of successive student leadership on club impact. I have absolutely no concern here as it relates to Delta Sigma Pi. All of the members are enthusiastic and involved, and club keeps a regular schedule of meetings and has a full calendar of professional activities.

Delta Sigma Pi Role in Campus Life. The colony members are recruited from every corner of Georgia Tech. In addition to the business school (the Scheller College of Business) Deltasig members come from the engineering and college of science schools; providing a diversity of educational and cultural backgrounds. A chapter at Georgia Tech would enrich the student lives across the university. The colony at Georgia Tech has been especially active in professional activities and has provided the opportunity for the members to network with and learn from local practicing professionals. The colony has also had an impact off campus with social and philanthropic events targeted towards local and global social enterprises.

Georgia Tech. “I’m a Ramblin’ Reck from Georgia Tech and a Hell of an Engineer” are words from one of the most famous of all college fight songs. Georgia Tech is one of the most prominent technology institutions in the world. Georgia Tech is ranked #7 among public universities in the country by *U.S. News & World Report*. Georgia Tech's industrial engineering program has been ranked #1 for more than two decades. Ten of the undergraduate engineering are in the top 10. Georgia Tech is also a top university in graduating female and minority engineers. Georgia Tech's Scheller College of Business is consistently ranked in several business magazines as in the top 30 in the US. The point here is that having a chapter again at Georgia Tech can also add value to Delta Sigma Pi. A top university like Tech should have the top professional business fraternity as an on-campus student organization.

In closing I would like to mention that several of my best friends today are brothers I met in the Zeta Lambda chapter at Georgia Tech over 40 years ago. Some of my most vivid memories of my time as a student at Georgia Tech are of the good times I had as a Deltasig brother. I know what an organization like Deltasig can do in terms of bringing together students with a common interest in business and the world beyond campus boundaries. I sincerely hope that the board approves the Georgia Tech petition, rewards the efforts of the colony's founding members, and provides a Delta Sigma Pi chapter for future generations of Georgia Tech students.

Sincerely,

Alan D. Flury

Adjunct Professor

Scheller College of Business

Georgia Institute of Technology

Delta Sigma Pi
Board of Directors
330 South Campus Avenue
Oxford, OH 45056

January 5, 2016

Dear Delta Sigma Pi Board of Directors:

I am writing on behalf of the Gamma Iota Tau Colony of Delta Sigma Pi (DSP), a chartered student organization of Georgia Institute of Technology. As the Director of Georgia Tech's Office of Leadership and Civic Engagement, student organization chartering and registration is a function of our office. I am pleased to offer my recommendation that the Colony be awarded with a chapter charter from its Board of Directors in re-establishing the Zeta Lambda Chapter of Delta Sigma Pi.

As a chartered student organization, the Gamma Iota Tau Colony of DSP completed a rigorous four-step charter process that demonstrated commitment to our department mission to provide avenues for student learning and global awareness, as well as to nurture the development of responsible, global citizens and inclusive leaders who are committed to building community in the intricate, multilayered world.

In the fifteen months since their colony charter, the members of the GIT Colony of DSP have lived up to their commitment with a wide range of professional and civic activities that benefit not just our students, but the larger community outside of Georgia Tech. I am looking forward to having a Delta Sigma Pi chapter join the Georgia Tech family of student organizations.

Sincerely,

E. Gerome Stephens, Ph.D., *Director, Leadership & Civic Engagement*
gerome.stephens@gatech.edu

Delta Sigma Pi Board of Directors
339 South Campus Avenue
Oxford, OH 45056

It's my pleasure to recommend that the Delta Sigma Pi Colony at the Georgia Institute of Technology be awarded full chapter status. I have been impressed with the leadership of Delta Sigma Pi and how quickly they have established a presence on campus.

Under the leadership of Olivia Malice, the Colony has grown to 27 students since being activated in the Fall of 2014. The Colony has distinguished itself by holding a number of worthwhile professional events. These include a resume writing workshop, a workshop on negotiating job offers, and a talk on leadership from a Georgia Power executive.

The Colony has also participated in a number of philanthropic activities. These events include Books for Africa, sandwich making for the Atlanta Mission, and a fundraising picnic for Bosley's place. The members enthusiastically these activities.

The Delta Sigma Pi Colony is also lucky to have an active faculty advisor. Alan Flury, an adjunct professor in the Scheller College of Business, has been actively guiding the Colony since Fall 2014. He was also a member of the Zeta Lambda chapter of Delta Sigma Pi at Georgia Tech almost 40 years ago. He brings significant experience to his advisor role.

In sum, I support the Colony be awarded full chapter status. Please let me know if I can provide additional information.

Best regards,
Jonathan Clarke, PhD

Associate Dean and Associate Professor Finance

Brother Onuka Ibe
Grand President
International Fraternity of Delta Sigma Pi
330 South Campus Avenue
Oxford, OH 45056

Dear Brother Grand President,

Since my beginnings with Delta Sigma Pi, I had heard about the chapter at Georgia Tech and I couldn't have been happier when Brother Olivia Malice reached out to DSP on September 2, 2014 about reinstalling the chapter. Since that time, she has worked tirelessly with the school, students, administration, local businesses and Fraternity as a whole to build the colony of Gamma Iota Tau.

While I personally have not spent as much time with the colony as I should, they have done so much with outreach, whether social, professional or service, in a rather short time and I have been amazingly impressed with their communication and willingness to bring everyone together. The colony members and officers have a great rapport, which is what has progressed them this quickly and everyone has really stepped up to ensure they build a strong positive reputation at GA Tech.

This chapter has a huge potential to be a top DSP chapter and really set themselves apart as an exemplary organization, for the school, region and Fraternity and it is with my extreme pleasure that I recommend the Gamma Iota Tau colony be installed as a chapter of Delta Sigma Pi.

Fraternally,

Carrie Sagel Burns
Southeastern Regional Vice President

January 6, 2016

Delta Sigma Pi Board of Directors
330 South Campus Avenue
Oxford, OH 45056-2405

Dear Delta Sigma Pi Board of Directors,

It is with great pleasure that I write this letter of recommendation in support of the Gamma Iota Tau colony at the Georgia Institute of Technology. Having served as their District Director since January of 2015, I have seen the hard work and dedication that this group has displayed numerous times. After having seen their accomplishments I believe that this colony is fully prepared to become a chapter of Delta Sigma Pi.

After starting with 3 members in January 2015, Gamma Iota Tau grew to around 20 members and today is 28 members strong. Over the course of their expansion they have hosted a number of successful professional, service, fundraising, and social events. In addition, they have attended events of other collegiate chapters and alumni chapters. Their professional activities included a "How to Get the Job" series that featured events like Resume Writing, LinkedIn Workshop, and Negotiating After the Job. The colony participated in service events together including: Books for Africa where they helped to sort and ship books for kids in Africa, Rivers Alive where they helped to remove trash and weeds from a local park, and Letters for Soldiers where they wrote holiday letters to troops that were sent by the Red Cross. One of the impressive aspects of this colony is the number of social events they held to really get to know one another. From baseball games to holiday parties they bonded and have been a truly great example of what brotherhood should be.

On a National level, the colony has been well represented. Since its founding they have had representation at every LEAD and GCC event. The most recent LEAD was attended by 8 of their current members. The colony president, Olivia Malice, was recognized on a national scholarship level being awarded the Bob and Dorothy Busse Scholarship from the Delta Sigma Pi Leadership Foundation.

The professionalism and motivation of this colony has driven my recommendation that the Board of Directors approve the petition for the Gamma Iota Tau colony to be installed as a chapter of Delta Sigma Pi. Having worked with the members on a personal level over the past year I am confident that this colony will represent the principals of the organization to the fullest. Their determination and efforts to become a chapter have far exceeded anything I have seen before, and I believe they are ready to become brothers of the prestigious organization, Delta Sigma Pi.

If you have any questions, do not hesitate to contact me directly.

Fraternally,

Katie Connelly
District Director
Gamma Iota Tau
239-776-6109
kconnell59@gmail.com

January 10, 2016

To whom it may concern,

I am writing this letter to recommend that the Gamma Iota Tau Colony's petition for a charter be approved. I have had the pleasure of meeting many of the colony members at several events over the last year, and I am sure that they will continue to serve as an asset to our Fraternity once they become a chapter.

My first experience with the colony was during their initial recruitment week, at a sponsor night at Yogli Mogli. At that point they probably had less than 10 members, but I could already see that they were building the strong and passionate core group that would begin their executive committee. In the Fall I was invited to be a part of an Alumni panel they were having during that recruitment season. When I came to this panel I saw the growth, in both size and experience, that the colony had made since my last visit in the Spring.

Throughout the next several months the colony continued showcase it's passion for our Fraternity by supporting the Atlanta Alumni, attending the Fall LEAD school in Greensboro, and coordinating events with other local collegiate chapters. One particular event I would like to highlight is the Atlanta Alumni Chapter's Founder's Day Celebration. At this event, the Gamma Iota Tau colony outnumbered the alumni brothers in attendance, and definitely left an impression on the entire alumni chapter. Not only were they all extremely professional, but more importantly they all were eager to learn more about the history of Atlanta Alumni chapter and meet many of the brothers which were a part of that history.

After seeing all the work that they have put into their various recruiting, social, professional, and service events, I strongly believe that they have earned the right to be included within our ranks. I would personally be honored to be able to greet each of them as a brother of Delta Sigma Pi.

Sincerely,

C.J. Cook
Iota Mu Chapter of Delta Sigma Pi
District Director

The Georgia Institute of Technology

The Georgia Institute of Technology (Georgia Tech) was founded as the Georgia School of Technology on October 13, 1885 in Atlanta, Georgia. The creation of the school signaled the beginning of a transformation of the American South, from one of an agrarian economy to that of an industrial economy. With the leadership of its first President, Dr. Isaac Hopkins, the school opened its doors to 84 students in October, 1888. The school symbol, as emblazoned on its crest, was an anvil, reflecting a curriculum oriented toward vocational training. The only degree offered at the time was a Bachelor of Science in Mechanical Engineering, although other classes were offered through the departments of Chemistry, Mathematics, and English. Over the next decades, Georgia Tech added schools for Civil Engineering and Electrical Engineering.

From the start, it was believed that Georgia Tech would be able to pay its bills by doing commercial shop work. In 1896, the program was dropped for failing to produce enough income to cover the schools costs and its growth plans. Even so, Georgia Tech's identity and mission was clearly evolving from a post-secondary trade school to a academic university.

In 1908, new curriculum requirements were established for all Tech majors. In response, the English Department began teaching courses in economic theory, general history, political economy, and physical geography.

In the years that followed, Georgia Tech grew in academic stature, adding numerous other schools and departments to its family. In 1948, the Georgia Board of Regents authorized Tech to change its name to the "Georgia Institute of Technology" to emphasize its growing focus on advanced technological and scientific research.

Since its charter, Georgia Tech has evolved into an international leader in managing the global transition from an industrial economy to an information economy. As a leading research and technology university, Georgia Tech focuses on preparing to use their innovative skills and strong work ethic to solve real-world problems and improve the lives of people on a global scale.

The Scheller College of Business & the Ivan Allen College of Liberal Arts School of Economics

Business classes were first offered at Georgia Tech curriculum in 1913 with the establishment of the Tech's Evening School of Commerce. A co-educational school, it was formed to accommodate working men and women seeking further training in business. The first classes, taught through the English Department, were Economics and Business English. As the school and its courses grew, students were able to work toward the degree of Bachelor of Commercial Science by completing 120 hours of college work. The faculty welcomed several special lecturers drawn from the Atlanta business world.

In 1934, the Department of Economics was established. A year later (1935), the School of Commerce was replaced by the Department of Industrial Management.

In 1948, when The General College was formed at the same time to house a number of academic departments and schools, including the Department of Economics and the new School of Industrial Management. The latter split from the General College in 1969 to form the College of Management.

In 1988, Ivan Allen College of Management, Policy, and International Affairs was established and named in honor of Ivan Allen, Jr. (Commerce '33), a businessman and two-time mayor of Atlanta during the turbulent 1960's. The School of Economics and Industrial Management was among the six schools contained within the new college. The two disciplines went their separate ways in 1998, when the Dupree College of Management was formed. The School of Economics remained a part of the Ivan Allen College of Liberal Arts.

In 2003, Technology Square opened on the east side of the urban campus, offering a new home to the College of Management, and establishing the Economic Development Center, the Global Learning Center, the Georgia Tech Hotel & Conference Center, Technology Square Research Building, the Advanced Technology Development Center, and incorporating a variety retail outlets.

In 2012, a 1952 graduate of the college, businessman Ernest Scheller Jr., made a \$50 million gift, changing the name of the school to the Scheller College of Business.

During the 2015-2016 academic year, the Scheller College of Business offered degrees, concentrations, and certificates in:

Accounting,
Consulting,
Entrepreneurship,
Finance,
General management,
International business,
Marketing,
Management information systems,
Production/operations management,
Organizational behavior, and
Supply chain management/logistics.

The School of Economics in the Ivan Allen College of Liberal Arts offers degrees in:

Economics
Economics & International Affairs
Global Economics & Modern Languages

Enrollment Statistics for 2015-2016

History of Gamma Iota Tau Colony

In Fall 2014, Olivia Malice, a Brother initiated at the Iota Mu chapter, transferred to Georgia Tech from Georgia College and State University. A month into the Fall Semester classes, it became apparent to her that Georgia Tech needed a new student organization for students of the business school. After learning there was once a Delta Sigma Pi chapter on campus in the sixties, she decided to work towards reactivating the original Zeta Lambda Chapter. By late October, she had the letter of intent and the signed permission form from the Dean of the Business School, which she sent in to Central Office. Two weeks later, Delta Sigma Pi officially had an active presence on the Georgia Tech Campus.

Recruiting those first pioneers was no easy feat. In Spring 2015, Sahithi Solipuram decided that she wanted to start a new business fraternity on GT's campus. After researching potential fraternities to colonize, she realized that there was already an initiative to colonize DSP at Tech. Sahithi emailed Central Office, got Olivia's contact information, and the rest is history. They spent a couple months preparing recruitment materials. In March, the two hosted the DSP colony's first recruitment week. By the end of Spring Semester, the colony was 15 members strong with a majority of them holding an officer position.

Katie Connelly, the district director for Gamma Iota Tau Colony, provided guidance from the very beginning of the colonization process. During Summer 2015, a strategic planning meeting was held to discuss how the colony would recruit new members. They continued their new member recruitment process at the freshman orientation sessions (FASET) throughout the summer.

In Fall 2015, the colony held a two-week recruitment program with fundraising, community service, social, and professional development activities for the duration. By the end of recruitment, the colony grew to add ten more members. The colony continued to recruit informally throughout the semester. Members were encouraged to bring friends, peers, and classmates to the professional activities hosted by the colony. Colony meetings and professional events were hosted on alternating Mondays, with executive board meetings every Tuesday.

Members of the colony have proven to be enthusiastic about Delta Sigma Pi, not only on the Georgia Tech campus, but also regionally and nationally. Representatives from our colony have been present at every national fraternity conference since the colony's inception, including two LEAD Schools, one LEAD Provincial Conference, and the 2015 Grand Chapter Congress. The colony has also established a close relationship with the Atlanta Alumni Chapter, attending their events, including the Founder's Day Dinner and the Holiday Party.

Professional Activities

Nu Pi Chapter Event | Katie Connelly April 21, 2015

District Director Katie Connelly presented her experiences with the fraternity and her leadership roles during a chapter meeting at Kennesaw State University's Delta Sigma Pi chapter, Nu Pi.

Alumni Panel | DD Katie Connelly, AAC members CJ Cook and Shane Borden

September 1, 2015

As a part of our recruitment week events, we invited Deltasig Alumni to sit on a panel and present their diverse perspectives of how Delta Sigma Pi has helped them get further in life, both personally and professionally.

Georgia Tech Career Fair

September 14 – 15, 2015

Georgia Tech hosts a Career Fair with over 400 businesses working hard to recruit the best Georgia tech has to offer. We encourage all our members to go, and many of the students that attended have job and internship offers from many large companies.

Leadership | Jennifer Zeller

October 5, 2015

Zeller works for Georgia Power, A Southern Company, as manager of Research and Engineering Services. She came out to talk to us about her climb to the top. She is highly accomplished and shared life advice with us.

LinkedIn Workshop | Colleen Pinto

October 19, 2015

Colleen Pinto of the Atlanta startup AR|PR hosted a workshop with us for the entirety of campus to talk about how we can best utilize LinkedIn to get the internships and jobs that we want as students still in college. She reviewed student's profiles and gave advice for how they could improve.

Resume Writing | GT Career Center

October 26, 2015

We partnered with the Georgia Tech Career Center to have speakers come out to talk to us about resume writing.

Negotiating After the Offer | Sam Zamarripa

November 2, 2015

Sam Zamarripa, a past Georgia Senator, came out to talk to us about how to negotiate using our own negotiating personalities.

Risk Management | Katie Connelly

November 9, 2015

Our District Director, Katie Connelly, gave us an evening to talk about risk management and our social media profiles.

Stress Relief with Yoga Breathing Techniques | Dr. Suprateek Kundu

November 30, 2015

We organized a yoga session to help people ready themselves psychologically for finals week. One of our members, Apurva Kasam, is also a member of GT's chapter of 'Art of Living'. Their goal is to create a stress-free, violence-free society. One of the regular speakers at GT's AOL is Dr. Suprateek Kundu, who is an Assistant Professor in the Department of Biostatistics at Emory University. He was gracious enough to come out to our College of Business and give us an hour of his time to hold a workshop on breathing techniques useful when stressed out.

Community Service Activities

Books for Africa

April 23, 2015

Last spring, DSP donated hours of time to Books for Africa, a charity that collects, sorts, and ships books to students in Africa. These books help teach children how to read.

Sandwich Making

September 4, 2015

As a part of our recruitment week in the fall, we set up a sandwich-making assembly line in order to produce about 50 sandwiches to be donated to the homeless through the Atlanta Mission.

Bosley's Place Fundraising Picnic

October 18, 2015

Our colony aided startup charity Bosley's Place by helping to run their first annual Barbeque picnic. Bosley's Place is a charity organization that raises neonatal puppies to an age at which they are old enough to be adopted by a family and taken home.

Rivers Alive

September 26, 2015

Delta Sigma Pi went to Azalea Park in Roswell to be a part of the Rivers Alive Clean Up. We removed non-native plants from the park, as well as trimmed trees and aided in trash pick-up.

Pop-Tops for Ronald McDonald

October 1 - November 5, 2015

As a part of our regional philanthropy, we collected several pounds of pop-tops and donated them at our regional conference to be given to the Ronald McDonald House.

Letters for Soldier

December 3, 2015

Delta Sigma Pi set up a table at the Scheller College of Business for students and faculty to write letters for soldiers during the holiday season. We contributed 63 letters to the American Red Cross.

Social Events

Flip Burger Social | April 8

As one of the first social events, the colony members went out to dinner and had an opportunity to get to know each other.

Study Break | April 25

The VP of Scholarships and Awards, Alisha Goel, put together a small gathering with food and beverages during finals week for the colony members to take a break from studying and relax.

Braves Game Date Night | October 2

The colony members of Gamma Iota Tau and the brothers of Iota Mu Chapter attended a Braves Game at Turner Field.

Colony Dinner at Ray's Pizza | November 9

The colony had dinner at Ray's Pizza before a colony meeting.

Chipotle Social | November 15

The colony members had a social at Chipotle and were encouraged to bring a friend who would be interested in joining the organization.

GT-UGA Tailgate | November 28

The colony members hosted the brothers of the Pi Chapter at UGA for a tailgate before the Georgia Tech and UGA football game.

Holiday Celebration | November 29

The colony members gathered for a Holiday Party with a tacky Christmas theme. The members ate food, played games, and participated in a white elephant gift exchange.

Scholarship Activities

Skippy Jar

The VP of Scholarships and Awards would pass around a jar at each colony meeting and everyone who attended all of their classes put their name on a slip of paper in the jar. Each week a winner was chosen and awarded a small prize.

Concentration Buddies

The VP of Scholarships and Awards set up a concentration buddy system for the colony members. Each member is assigned a concentration buddy for help with classes as well as to promote brotherhood.

Pi Scholarship Banquet | November 21

A scholarship banquet was hosted to award and celebrate the Scholarship Award Winner.

Fundraising Activities

Percentage Night at Yogli Mogli

March 5, 2015 & August 31, 2015

Delta Sigma Pi hosted a percentage night at the local Yogli Mogli on campus during recruitment week to fundraise money for the organization.

Sponsorship Packet

In order to raise the remainder of our petition fee, we developed a Sponsorship Packet that outlines how Delta Sigma Pi at Georgia Tech can partner with local business.

Member Biographies

Olivia Malice | President

Hometown: Marietta, Georgia

Major: Operations & Supply Chain Management

Minor: Biology

Expected Graduation Date: Fall 2017

Career Goals: Olivia's dream is to spend her entire life surrounded by animals. Concluding college, she plans to continue on to veterinary school, and then travel the world working as a global veterinarian. Olivia intends to conclude her veterinary career early and move to the Costa Rican rain forest to work as a conservationist and environmental educator in the most lushly bio-diverse regions of our planet.

Interests/Hobbies: Watercolor painting, photography, nature hikes, eating desserts, indoor gardening

Sahithi Solipuram | Senior Vice President

Hometown: Johns Creek, Georgia

Major: Information Technology Management

Expected Graduation Date: Spring 2017

Career Goals: Sahithi hopes to work in the IT field focusing in on business analytics. She aspires to one day put her passion for IT and fashion together by working for a high-end fashion retailer.

Interests/Hobbies: Reading, painting, comedy, and music

Shan Bawany | VP of Finance

Hometown: Karachi, Pakistan

Major: Finance

Expected Graduation Date: Spring 2018

Past Position Held: Fundraising Chair

Career Goals: Shan's passion is to become a financial analyst and work at one of the Big Four after he graduates. At the same time, he wants to be able to give back to the community through philanthropic works.

Interests/Hobbies: Hiking, swimming, and creating podcasts

Mita Rangarajan | VP of Colony Operations

Hometown: Suwanee, Georgia

Major: Accounting

Expected Graduation: Spring 2017

Past Position Held: VPF

Career Goals: Mita aspires to work for a Big 4 firm and aims to grow to the partner level. She would like to work in tax and consult with a diverse range of companies.

Interest/Hobbies: Dancing, visual arts and working with collegiate organizations to give back to the community

Morvarid Maghari | Chancellor

Hometown: Johns Creek, Georgia

Major: Finance

Expected Graduation Date: Fall 2016

Past Position Held: Social Chair

Career Goals: Morvarid aspires to work at BMW upon graduation and grow from there. She wants to work in a world where she can drive beautiful and exotic BMW's all the time.

Interests/Hobbies: Cars, soccer, cooking, traveling, and experiencing different culture

Haley Howard | VP of Alumni Relations

Hometown: Dallas, Georgia

Major: Information Technology Management

Expected Graduation Date: Spring 2017

Past Position Held: VP of Marketing

Career Goals: Haley wants to pursue a career in Search Engine Management following graduation. Her goal is to work at Google within their Technical Infrastructure department.

Interests/Hobbies: Reading, playing and listening to music, and exploring new restaurants

Quynh Nguyen | VP of Professional Activities

Hometown: Morrow, Georgia

Major: Information Technology Management

Certificate: Business Analytics

Expected Graduation: Fall 2016

Career Goals: Quynh hopes to work for a large company in the IT department focusing on security and risk. She wants to use her skills and experience in organization and innovative problem solving to build a greater future for society.

Interests/Hobbies: Traditional Vietnamese and Chinese Lion dance, painting, reading, and martial arts

Paul Giorgi | VP of Community Service

Hometown: Peachtree City, Georgia

Major: General Management

Minor: Pre-Law

Expected Graduation Date: Spring 2018

Past Position Held: Chancellor

Career Goals: Paul aspires to work in corporate law for two years upon graduation and then attend law school. Post law school he plans to become partner at a local law firm. Paul also has a passion for politics and would like to one day run for elected office. He plans to use his degree and passion for law to further advance our countries immigration policies.

Interests/Hobbies: Photography, tennis, community service, and music

Nicole Henson | VP of Scholarships and Awards

Hometown: Peachtree City, Georgia

Major: Operations & Supply Chain Management

Expected Graduation Date: December 2017

Career Goals: Nicole aspires to graduate from Georgia Tech and work on improving supply chain management within the healthcare field. After working for a few years, she wants to get her MBA with a concentration in Human Resources and eventually become a Director of Human Resources.

Interests/Hobbies: Horse-riding, concerts, tennis, and golfing

Shalaka Patel | VP of Marketing, Installation Chair, Historian

Hometown: Suwanee, Georgia

Major: Information Technology Management

Certificate: Business Analytics

Expected Graduation Date: Spring 2017

Career Goals: Shalaka aspires to work at Johnson & Johnson upon graduation and grow from there. She wants to use her knowledge, skills, and experience to make an impact in healthcare using technology.

Interests/Hobbies: Dancing, reading, painting, and music

Induja Kannan | Fundraising Chair

Hometown: Johns Creek, Georgia

Major: Finance

Expected Graduation Date: Spring 2019

Career Goals: Induja aspires to pursue a career in corporate finance or investment banking and eventually attend graduate school to receive an MBA.

Interests/Hobbies: Reading, writing, and learning languages

Danny Panyavuthilert | Social Chair
